Comments From Actual Users:

... very impressed with the functionality of the app. It definitely kept my meeting on track. ...Thank you for producing a great app!

Love this app and I'm already getting more out of it than the ones I wasted money on because they looked more comprehensive (but weren't).

I really like your product. It makes the planning of meetings easy and helps a lot regarding documentation and follow up meetings. I especially like the import function to easily put items from one meeting into a follow up meeting.

I love being able to take a photo and have it as part of the meeting notes. Great work on the app!

I actually value the focus on workflow which, I have found, keeps meetings on track (half the battle for anyone chairing meetings).
